

# LASER CHEMICALS Adopts the NSF International Mark of Quality

As part of our ongoing mission at Laser Chemicals to deliver a best of breed, world-class range of high quality, risk managed products, we have registered 13 of our most popular lines with the NSF Nonfood Compounds Programme. Previously endorsed by the SABS Mark - we now take pride in ensuring their safety for appropriate use, having passed the stringent and thorough toxicology testing under the watchful eye of NSF International. NSF International is the only independent, third-party organisation that offers product registration for nonfood compounds such as lubricants, cleaners and water treatment chemicals used in food and beverage processing.

Whilst we at Laser Chemicals are confident that our products meet the necessary regulatory requirements, we always advise on the strict adherence to manufacturer's instructions at all times when in use.

Below are listed the 13 products successfully registered. We will update and post our product listings online as more are registered with NSF International.

MADE WITH  
**BIODEGRADABLE**  
RAW MATERIALS

Since the levels of perfumes and dyes incorporated in our products are minimal, it is deemed that the final dilution of the ingredients should not be harmful to the environment.

**FLAMMABLE**  
SUBSTANCE

Certain products contain flammable substances. This icon indicates that the product has been deemed flammable.

LIQUID VOLUMES 5L (x4) | 25L | 210L DRY POWDER VOLUMES 5kg | 25kg
